

CONFIGURATION, INITIALIZATION & LOG ON

- ✍ Before operating your DTI loaded terminals you must follow all: Configuration, Initialization & Log On procedures as outlined by Moneris Solutions in the MagIC 9000 Merchant Operating Manual, or as instructed by your representative. DTI value-added software does not conflict with the regular operation of any Moneris Solutions (RET) loaded device.

- ✍ However, the proper use of DTI software is dependant upon setting the “CLERK ID REQUIRED” flag to NO (we would also recommend setting the “RETAIL ALLOWED” flag also to NO) in the Moneris (RET) Application. You may follow the instructions as indicated on pages 32 & 33 of your MagIC 9000 Merchant Operating Manual, visit www.moneris.com/merchant/manuals/index.html or contact DataTrax Technologies at 1-877-269-1348 for detailed instructions.

- ✍ DTI loaded terminals can be easily initialized with any DTI call centre representative Monday’s thru Friday’s from 9am – 5pm Eastern Standard Time. The DTI call centre help desk is otherwise open 24 hours / day 7 days a week at 1-877-269-1348 for all other current customer inquiries.
