

MAGIC 9000 TERMINAL - CUSTOMIZED FEATURES ALL VERSIONS – PAGE 1 OF 2

- ✍ Offline Credit/Debit Transaction Processing
 - ✍ Offline Debit Transactions are currently prohibited. However, Offline Credit Card sales and same day returns and voids can be processed with DTI loaded terminals (Financial Rules).

- ✍ Instant Messaging
 - ✍ Your host PC may be programmed to send messages at any time & any number of times throughout the each business day.

- ✍ Deleting Inventory
 - ✍ If you have a limited number of items in your inventory to sell. You may flag these items so that your terminals will communicate with your PC to check for, hold & then reserve the quantities requested. Reserved product is then deleted from your inventory insuring that product is never oversold.

- ✍ Service Charge & Cash Back
 - ✍ DTI loaded terminals give you the ability to distribute additional cash back to customers beyond the level of their purchases and then charge them for this service. Charges may be levied at your discretion for this service.

- ✍ Quotations
 - ✍ Trades people and others may choose to use this feature to give prospective customers in-the-field instant quotations on work to be done. Quotations are sent to your host PC for future reference. (Quotations can never issue tickets @ DTI)

MAGIC 9000 TERMINAL - CUSTOMIZED FEATURES ALL VERSIONS – PAGE 2 OF 2

- ✍ Self Test (Auto Diagnostics)
 - ✍ From time to time MagIC 9000 terminals may temporarily operate below ideal conditions. When the cursor hovers over Self Test and the terminal user presses OK approximately 10 conditions are tested and the appropriate messages displayed.

- ✍ Price Look-ups (PLU's)
 - ✍ Customers may load their MagIC 9000 terminals with hundreds of product offerings. Although different screen flows can adjust for different product and sub-product selections it is often preferred to enter each item via PLU's.

- ✍ Commissions, Sales Tracking & Partner Sales
 - ✍ Each of your products have the ability to be flagged with either percentage or fixed commissions amounts. Categorizing products as sourced from a 3rd party will also allow you to track contract rates & margins (sales, receivables & payables).

- ✍ Time Clock
 - ✍ Your terminal can act like a time clock for employees. This data is tracked & sent to your PC host for reporting purposes.

- ✍ Real-Time Account Inquiries
 - ✍ When using the On Account method of payment, your host PC will track your receivables for future invoicing. Additionally, your terminals can query your host PC (real-time) to check outstanding balances on any of current accounts.
